

Special Issue

Computational Biomechanics and Biomimetics in Flying and Swimming

Message from the Guest Editors

This Special Issue aims to focus on computational models, numerical algorithms and methods, and computer software and frameworks in the biomechanics and biomimetics of biological flying and swimming, and their applications. The topics of interest include, but are not limited to:

- Computational fluid dynamics with geometrical and kinematical complexities of a body, wings, and fins;
- Numerical algorithms and methods for coupled multiphysics such as wing–air and fin–water interactions;
- Modeling for wings, fins, and joints, which consist of complex and multiscale structures, such as reduced order modeling and multiscale modeling;
- Complementary methodologies such as scaling laws;
- Computer software and frameworks for coupled multiphysics and large-scale analyses;
- Passivity of flexible structures;
- Control and maneuverability in flying and swimming;
- Simulation-based biomimetic design for flying and swimming biorobots.

Guest Editors

Prof. Dr. Daisuke Ishihara

Prof. Dr. Hao Liu

Prof. Dr. Shinobu Yoshimura

Deadline for manuscript submissions

closed (31 October 2023)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Stanislav N. Gorb

Department of Functional Morphology and Biomechanics, Zoological
Institute, Kiel University, 24118 Kiel, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Engineering, Multidisciplinary) / CiteScore - Q2
(Biomedical Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 19.5 days after
submission; acceptance to publication is undertaken in 2.8
days (median values for papers published in this journal in
the second half of 2024).
