Special Issue

Parkinson's Disease—— Honorary Special Issue Commemorating the 80th Birthday of Professor Peter Riederer

Message from the Guest Editors

This issue is dedicated to the 80th birthday of Professor Dr Peter Riederer. He is one the most influential experimental researchers in the field of neurochemistry in psychiatry and neurology. His life time achievement is characterised by the continuous successful approach to combine clinical and experimental research. This honorary issue in "Biomolecules" reflects this scientific principle and includes experimental findings and outcomes of clinical studies. The editors wish Professor Riederer many further fruitful future years and thank him for his continuous support over the years. Prof. Dr. Thomas Müller

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.
