Antimicrobial Peptides: Development, Conjugation, and Beyond

Message from the Guest Editor

Bacterial resistance means that many researchers are looking for alternatives to currently-used antibiotics. One strategy being explored is to use antimicrobial peptides (AMPs). AMPs are considered to be viable alternatives to currently-used antibiotics, because they have a broad antimicrobial spectrum and since bacteria develop little or no resistance towards them. In addition, AMPs are ubiquitous in nature and are involved in the first line of defense in plants and animals. Although AMPs are promising, only a few are used for systemic therapy. The number of AMPs currently being used is limited because these compounds often display adverse effects such as unknown toxicity against host cells, short circulation half-life due to protease digestion and rapid kidney clearance.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
