

## Special Issue

# Neuron–Astrocyte Interactions in Neurological Function and Disease

### Message from the Guest Editors

Astrocytes play a central role in brain homeostasis and the modulation of synaptic transmission, and the reciprocal communication between neurons and astrocytes has emerged as a key process in neurophysiology. This aspect cannot be overlooked when investigating the mechanisms involved in neuropathological conditions. Indeed, while *ex vivo* and *in vivo* findings continue to provide new insights into how astrocytes integrate neurons in modulating brain circuits and, ultimately, animal behavior, several studies on neuropathological conditions have revealed alterations in astrocyte signaling pathways, often accompanied by a shift to a reactive state and significant transcriptome changes. Viewing this Special Issue as an opportunity to disseminate recent research findings to a wide audience, we welcome reviews and research articles that address this intercommunication at structural, molecular and cellular levels, with a particular focus on findings related to neurological function and dysfunction.

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
