Targets and Treatment Approaches for End-Stage Liver Diseases

Message from the Guest Editors

This Special Issue is designed to cover multiple targets and treatments of end-stage liver diseases, such as fibrosis, cirrhosis, and liver cancers. We welcome original research and review articles of a broad spectrum, including experimental approaches for targeting pathologically important mechanisms, the outlook of therapeutic development, as well as the results of clinical trials.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.
