Alcohol-Related Organ Damage: Mechanisms, Outcomes, and Treatment Modalities

Message from the Guest Editors

This Special Issue has been designed to cover multiple mechanisms and treatment targets for alcohol-related organ damage, including liver, lungs, heart, kidney, brain, etc. We welcome original research articles and reviews on outcomes and co-morbidities of alcohol-associated pathologies studied experimentally or in clinical trials, with a special emphasis placed on pathogenesis-based treatment modalities.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.
