

## Special Issue

# Lipids of Marine Algae

### Message from the Guest Editors

The polar lipidome of marine algae (both micro and macro) is yet to be fully unraveled, although they are unanimously recognized as promising and valuable phytochemicals for a multitude of applications (e.g., food, feed, pharmaceutical, and cosmeceutical industries). Polar lipids are the main carriers of omega-3 fatty acids and have been reported to display anti-inflammatory, anti-oxidant, anti-microbial, and anti-proliferative properties. Lipidomic approaches using mass spectrometry technologies are being used in the profiling and identification of these health-promoting biomolecules. Lipid signatures reveal algal adaptations to multiple biotic and abiotic conditions, can support the development of origin certification protocols, and can also be used as reliable proxies for the quality control of raw algae or algal-based products. The accurate identification of the lipidome of marine algae will enhance the valorization of these biomolecules and foster innovative algal-based solutions for biotechnological and industrial applications. Dr. Rosário Domingues

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
