

Special Issue

Transient Receptor Potential (TRP) Channels: Markers and Therapeutic Targets for Cancer?

Message from the Guest Editors

This Special Issue is dedicated to describing recent progress in elucidating the mechanisms by which Transient receptor potential (TRP) channels modulate tumor progression. Indeed, given the rapid evolution of resistance in tumour cells to the current therapeutic opportunities, clinical research must promote innovative strategies targeting unexplored cancer-relevant markers such as TRP channels, which could hold promise. Several natural products, such as capsaicinoids, cannabinoids and terpenes, are TRP channel modulators and could contribute to the development of new therapeutic drugs. Therefore, we encourage scientists of diverse backgrounds to contribute articles covering studies on TRP characterization and translational approaches of clinical relevance.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
