Molecular Advances in Inflammatory Bowel Disease

Message from the Guest Editors

Inflammatory bowel diseases (IBDs) are chronic digestive diseases that affect the gastrointestinal system, primarily ulcerative colitis and Crohn's disease. The therapeutic management of IBDs lies in medical therapy (traditional and biological) and, when required, surgical treatment. This Special Issue aims to collect recent research in the field of molecular advances in IBD in a range of possibilities, from the rediscovery and/or implementation of new diagnostic/prognostic molecular methods (including IBD gastrointestinal endoscopy) to new evidence related to traditional and biological therapy (including small molecules and drug monitoring). Hearings will also be given to papers about patient-reported outcomes connected to all aspects of quality of life for patients with IBD if related to molecular mediators.

About the Journal

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
