

## Special Issue

# Vascular Endothelial Growth Factor (VEGF): From Basic Mechanisms to Clinical Significance and Drug Development

### Message from the Guest Editor

Vascular Endothelial Growth Factor (VEGF or VEGF-A), since its initial discovery in the late 1980s by Napoleone Ferrara, has been one of the most studied growth factors. The main reason for such avid interest in VEGF is based on its critical importance in blood vessel development, organogenesis, tissue homeostasis, as well as pathological processes associated with cancer progression and cardiovascular and neuronal associated diseases, to name just a few. The purpose of this Special Issue of *Biomolecules* is to bring together both original papers and review articles that encompass the complexity of VEGF biology and advancements in our understanding of VEGF signalling crosstalk in both developmental processes, organ homeostasis and disease progression, with a particular focus on cancer biology.

### Guest Editor

Dr. Jody Jonathan Haigh

1. Department of Pharmacology and Therapeutics, Rady Faculty of Health Sciences, University of Manitoba, Winnipeg, MB, Canada
2. CancerCare Manitoba Research Institute, Winnipeg, MB, Canada

### Deadline for manuscript submissions

closed (30 December 2020)

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

---

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
