

## Special Issue

# Nicotinamide in Health and Diseases

### Message from the Guest Editor

Currently, the utilization of NAM as a therapeutic, pharmaceutical, or dietary or cosmetic supplements has been increasing rapidly. According to the Market Study Report, sales of NAM increased from 55,407 MT in 2013 to 76,862 MT in 2017 urgently demanding a greater understanding of NAM and the associated physiology. Thus, this Special Issue is focused on but not limited to studies on the molecular mechanisms underlying the proposed effects and new possible applications of NAM. The effects of NAM on sirtuin family proteins and other NAD<sup>+</sup>-consuming enzymes are important molecular targets of study. The metabolism of NAM and NAD<sup>+</sup> need to be better understood to minimize potential side effects. In addition, studies of NAM's association to autophagy and organelle turnover will provide invaluable information on the cellular process of aging and shed light on its efficacy as an anti-aging regimen.

## About the Journal

### Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

### Editors-in-Chief

Prof. Dr. Peter E. Nielsen

Department of Cellular and Molecular Medicine, Faculty of Health and Medical Sciences, University of Copenhagen, Blegdamsvej 3C, DK-2200 Copenhagen, Denmark

Prof. Dr. Lukasz Kurgan

Department of Computer Science, Virginia Commonwealth University, Richmond, VA 23284, USA

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
