

Special Issue

Sensors for Environmental Monitoring and Food Safety—2nd Edition

Message from the Guest Editors

Electrochemical sensors and biosensors represent a promising solution for the affordable, quick, and decentralized testing of complex samples and are accessible even to those with minimal training. They hold significant potential for food and environmental analysis, but several technical and commercial challenges must first be addressed in order to fully realize their benefits. This Special Issue of *Biosensors*, titled “Sensors for Environmental Monitoring and Food Safety”, aims to showcase the latest advancements in this dynamic field. We invite you to contribute research that highlights recent developments and applications in this field. Our focus includes both electrochemical and non-electrochemical sensors, utilizing classical and advanced techniques such as enzymes, antibodies, DNA, aptamers, molecularly imprinted polymers, and nanotechnology. We welcome submissions in the form of reviews, communications, and research articles.

About the Journal

Message from the Editor-in-Chief

Biosensors is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

Editor-in-Chief

Prof. Dr. Giovanna Marrazza

Department of Chemistry "Ugo Schiff", University of Florence, Via della
Laustruccia 3, 50019 Sesto Fiorentino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Chemistry, Analytical) / CiteScore - Q1
(Engineering (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2024).
