

## Special Issue

# Biosensors Applications Based on Field-Effect Transistors Technologies

### Message from the Guest Editor

Field-effect-transistor (FET) type biosensors have attracted the attention of researchers in academia and industry for various applications, including early detection of COVID-19. Considerable progress has been attained in designing FET devices, such as ion-selective field-effect transistor (ISFET) and bio-FET, especially for biomedical diagnosis and cell-based assays in the past few decades. The exceptional electronic properties, compactness, and scalability of these novel tools are very desirable for the rapid, label-free, and mass detection of biomolecules. This Special Issue will address the design, implementation, modelling, characterization, validation, and/or optimization of FET-based biosensors using standard microelectronic technology, such as complementary metal-oxide semiconductors (CMOS) and other microfabrication technologies.

---

### Guest Editor

Dr. Ebrahim Ghafar-Zadeh

Biologically Inspired Sensors and Actuators, Department of Electrical Engineering and Computer Science, Lassonde School of Engineering, York University, Toronto, ON M3J 1P3, Canada

## About the Journal

### Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Chemistry, Analytical) / CiteScore - Q1  
(Engineering (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2024).
