Substance Abuse in the Psychiatric Population

Message from the Guest Editors

Substance abuse has long been a major concern in the psychiatric population. There is indeed converging evidence suggesting that individuals suffering from mental health disorders are more vulnerable to substance abuse and vice versa. Such dual diagnoses can lead to more complicated treatment outcomes, higher relapse rates, and poorer prognoses among affected individuals. The overarching aim of this Special Issue is to explore the complex relationship between substance abuse and psychiatric disorders, highlighting new therapeutic modalities that could improve clinical outcomes. This issue will feature recent research on the neurobiological, psychological and psychiatric aspects of substance abuse and psychiatric disorders, advancements in dual clinical diagnoses, and innovative or traditional strategies for early intervention and prevention. We invite all types of articles, including original research, reviews, and case studies that focus on substance abuse in the psychiatric population. Papers emphasizing a translational from bench to bedside approach are highly welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
