

## Special Issue

# Application of Transcranial Direct Current Stimulation Based Methods in Neurological Diseases: New Advances and Perspectives

### Message from the Guest Editor

Transcranial direct current stimulation (tDCS) gained a renewed interest as a non-invasive brain stimulation method in health and disease. The therapeutic potential of tDCS is appealing to a wide range of patient populations as it provides a non-pharmacological approach with slight to no side effects, is inexpensive, and is easy to use even at home by patients—under supervision—with the potential of producing long after-effects when a suitable protocol is used. This Special Issue aims to present a collection of studies detailing the most recent advancements in the application of tDCS in neurological diseases. Authors are invited to submit cutting-edge research and reviews that address a broad range of topics related to the application of tDCS in patients with neurological diseases, including the following: the mechanism of action, how to choose the best tDCS parameters for different patient populations, the recommended dosage, new advances in targeting different areas in the brain, including deep areas in the brain, safety, using an augmentative treatment technique, targeting one area in the brain vs. several areas at the same time, and future perspectives.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
