Neurological and Psychiatric Disorders in the COVID-19 Era

Message from the Guest Editors

The extent of neurological and psychiatric disorders in the COVID-19 era is not yet fully established.

Neurological and psychiatric symptoms are common during COVID-19, and they may persist after recovery from the infection. Moreover, COVID-19 has deeply impacted the management of the other neurological and psychiatric disorders. The aim of this Special Issue is to better characterize the neurological and psychiatric disorders in the COVID-19 era, covering aspects related to the infection either during the acute phase or after recovery from COVID-19. For this purpose, we invite colleagues to share their recent research on this topic. Original research articles, review articles as well as short communications are invited.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
