

## Special Issue

# New Frontiers in Aging Psychiatry

### Message from the Guest Editors

With an increasingly aging population, there is also an increased risk that older people may experience late-onset mental health issues as well as develop neurodegenerative conditions that might facilitate the emergence of neuropsychiatric symptoms. In addition, independent factors such as, for example, prolonged periods of isolation such as those due to the current COVID-19 pandemic have acted as a catalyst for latent symptoms, increasing older people's chances for mental health distress. We focus on research that uses the most advanced methodology to provide a better understanding of psychiatric issues in aging, with a focus on understanding predisposing factors, biological factors, behavioral facilitators, and clinical phenomenology of psychiatric manifestations in aging. The objective is to act as a fulcrum for cutting-edge research based on advanced methodology to provide interested readers with the latest findings in aging psychiatry that might impact their clinical approach and their approach to treatment. We are soliciting papers in the field of aging psychiatry. Research and review papers will be welcomed.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
