Topical Collection

Visuospatial Function in Early Alzheimer's Disease, Healthy Elderly and MCI People

Message from the Collection Editor

From a perspective focused on prediction and prevention strategies, the purpose of this Topical Collection of *Brain Sciences* is to report up-to-date knowledge about visuospatial functions in small-scale and large-scale settings in normal aging, MCI, and AD. It aims to present studies that broaden the perspective on early signs of AD to include several cognitive-affective factors related to visuospatial function and memory complaints and to suggest new directions for future research, clinical evaluation, and potentiation training. We invite you to submit original research articles, analytical reviews, and meta-analyses of previous literature.

Brain Sciences

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:
reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
