Multisensory Perception of the Body and Its Movement

Message from the Guest Editors

There are well-known benefits to multisensory integration in daily activities, as successfully integrating multiple senses enhances the interaction between our body and the external environment. However, the underlying mechanisms affecting bodily perception and movement still require further exploration, as understanding these processes is necessary to investigate their critical role in daily actions, maintaining balance, and navigating through space. In this Special Issue, we welcome studies integrating multisensory perception of the environment and the body in the presence or absence of locomotion and movement, alongside submissions exploring the effects of sensory disabilities on bodily perception and spatial navigation, which will provide crucial insights into how sensory impairments alter these processes. Studies conducted on children, adults, and special populations that employ both behavioral and neurophysiological methods are welcome. , ,

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
