Advances in Hearing Loss Diagnosis and Management

Message from the Guest Editor

With a progressive aging of the population in the Western countries, hearing loss has become a significant public health preoccupation. The impact of this disability on the quality of life, autonomy and cognitive decline has been demonstrated by multiple studies. The interaction of hearing with other functions such as vision, balance, speech, and cognitive functions underlines the complexity of audition and the consequences of its loss. The improving comprehension of deafness in the fields of integrative physiology, molecular biology, genetics, and acoustics has led to a booming development of diagnostic, and rehabilitation techniques in the past decade. It has also opened insights in the fields of prevention and cochlear repair. Advances in the field of computer science have benefited many domains related to this problem, such as hearing aid technology, electrophysiology, imaging, surgery, and genetics. About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
