Emerging Concepts on Autoimmunity and Psychiatric Comorbidities in Demyelinating Disorders

Message from the Guest Editor

Psychiatric comorbidities commonly occur in demyelinating disorders, encompassing a wide range of pathology, from anxiety to psychosis. They may complicate diagnosis, quality of life, prognosis and therapeutic intervention. Several aspects of these comorbidities, such as pathobiology, correlation with immune and imaging biomarkers, prognostic significance and optimal treatments, have not been fully investigated. In this Special Issue we welcome original research and review articles investigating the role of neuroinflammation and autoimmunity in the development of psychiatric disorders, the mechanisms involved, the interplay between psychiatric morbidity and course of demyelinating disease, as well as advanced MRI metrics related to clinical severity and therapeutic outcome. Studies on optimal management and ways to improve the quality of life of people with demyelinating diseases and concurrent mental health disorders are also welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
