

## Special Issue

# Human Brain Responses and Functional Brain Networks across the Lifespan

### Message from the Guest Editors

Life-long adaptation of human brain networks allows for responding to life-period-specific challenges. This enables increasingly complex cognitive functions during development and compensational processes during aging. Enhanced neuroplasticity occurs during development or is triggered by life-changing events and may have a sustained impact on the later stages of life. Recent studies increasingly mirror how brain development and function are influenced by social experiences. Human brain development further relates to risks of emerging mental health disorders or accelerated mental aging. These multifold aspects of adaptations in human brain networks through life can be characterized by event-related and oscillatory EEG or MEG measures. Their high temporal resolution specifically enables determining age-related changes in the temporal coordination of multiple neural activation patterns and their integration within functional neural networks. The aim of this Special Issue is to bring together a broad range of EEG/MEG studies to better understand the mechanisms and functions of brain changes through the lifespan.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
