Neuropsychological Research of Risk Understanding and Decision Making: Normal and Pathological Profiles

Message from the Guest Editor

This Special Issue of *Brain Sciences* aims to present a collection of studies regarding risk comprehension and decision making in healthy people and in neurological patients (e.g., early dementia, Parkinson's disease, restless leg syndrome). Through this Special Issue, we will gain new insights into the possible changes in risk understanding and decision making that are related to, for example, normal or pathological aging. This is nowadays very relevant, as pandemic outbreaks require the understanding and compliance of the whole population, including the proportion of individuals with neurological conditions. Original research papers, meta-analyses, and critical reviews advancing our understanding of risk understanding, numeracy, decision making, and their relationships are solicited for this Special Issue. Studies adopting behavioral methods or methods from neuroscience are welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
