

Special Issue

Perceptual Organization from Phenomenology to Neuroscience and Artificial Intelligence: Principles, Phenomena, Illusions, and Issues

Message from the Guest Editors

The main purpose of this Special Issue is to put together scientists, scholars, and artists from different disciplines for a multidisciplinary interaction aiming to deeply understand inner problems, principles, phenomena, and illusions related and derived from perceptual organization. The main questions are: what do we really know about perceptual organization? What is perceptual organization within different perspectives? What are the main issues still unexplained? What is the meaning of inner principles? Which are the mistakes, illusions, and paradoxes derived from perceptual organization? What is vividness within the organization of our world? Is there one or many kinds of organizations for different living organisms? Does perceptual organization involve only external objects or even the perceiving subject? How does perceptual organization work in artificial systems such as neural networks? What do we learn from perceptual organization in neural networks? How is consciousness related to perceptual organization?

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
