

Special Issue

Neuromodulation, Brain Plasticity and Psychiatric Diseases

Message from the Guest Editors

Psychiatric diseases present a growing challenge for society. Recently, in spite of significant advances in the understanding of the altered cortical properties and plasticity of psychiatric diseases, concomitant improvements in treatments are still lacking. The heterogeneity of illnesses presents both a challenge and promise for personalized intervention. This Special Issue aims to present cutting-edge studies of clinical neurophysiology, neuroimaging, and neuromodulation in the field of psychiatric disorders. In order to provide a comprehensive perspective, we welcome original research papers, methodology papers, and review papers describing the use of the latest brain science approaches in the above fields. This Special Issue will provide innovative investigations to understand neurobiological mechanisms and set the groundwork for the development of the personalized neuromodulation of psychiatric diseases.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
