New Insight into Personality Disorders

Message from the Guest Editor

Personality disorders can be described as persistent alterations in reactivity and regulation with regard to the self and others. Recently, neurobiological findings have become more elaborated and insightful and are of great interest for this Special Issue. Additionally, endeavours towards intervention and prevention focussed on dialectic behavioural therapy; however, randomized controlled evaluation data on other approaches are sparse, yet needed, regarding the frequency and severity of personality disorders. Low-threshold interventions are of specific interest. Other cutting-edge targets are factors contributing to personality disorder, such as physical, sexual and emotional abuse; early life stress; and adverse childhood experiences. This Special Issue invites researchers studying the topic of child maltreatment to share their work with regard to the risk factors and longitudinal consequences of all different forms of personality disorders. Articles contributing to a transdiagnostic focus and a novel view on diagnostic and therapeutic standards in general will be highly welcomed.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
