

Special Issue

Cellular and Molecular Mechanisms in Brain Aging

Message from the Guest Editors

Aging is associated with cognitive decline and with increased susceptibility to neurodegenerative diseases, such as Alzheimer's and Parkinson's diseases, among others. The development of therapeutic approaches to mitigate the effects of aging on brain health and cognitive function requires a comprehensive knowledge of the age-related alterations to brain neuronal networks and the underlying mechanisms, which is still lacking.

This Special Issue is focused on the cellular and molecular alterations taking place during physiological and/or pathological brain aging, and on the elucidation of the mechanisms driving them. Submissions of both original research articles and review articles providing a critical discussion of recent progress in the field are welcome. Original research manuscripts providing mechanistic insights based on functional data are preferred, but descriptive studies will also be considered, as long as they do not duplicate previously published work.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
