Risk Factors for Mild Cognitive Impairment (MCI)

Message from the Guest Editor

Mild cognitive impairment is increasingly acknowledged as a risk factor for progression to dementia and, as such, has potential prognostic value. This Special Issue of *Brain Sciences* will discuss current methods (measurement, criteria) for the identification of mild cognitive impairment, and will examine potential risk factors for mild cognitive impairment. We welcome articles reviewing the identification and classification of mild cognitive impairment, describing new human and animal data, and emerging therapeutic interventions for the management of mild cognitive impairment. We hope we can count on your valuable contribution to make this a successful and impactful Special Issue for the journal.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
