Extracellular Vesicles (EVs) in Cancer Diagnostics and Therapy

Message from the Guest Editor

This Special Issue titled "*Extracellular Vesicles in Cancer Diagnostics and Therapy*" delves into the pivotal role of extracellular vesicles (EVs) within oncological research. Extracellular vesicles, encompassing entities such as exosomes and microvesicles, represent a class of cell-derived nanoscale particles. These vesicles are increasingly acknowledged for their significant roles in intercellular communication and their potential as biomarkers and therapeutic vectors in cancer. This compendium of research and review articles illuminates the molecular mechanisms through which EVs influence tumorigenesis, metastasis, and the tumor microenvironment. It also explores the advancements in EV-based technologies for early cancer detection, monitoring, and the delivery of targeted therapeutics, thus underscoring their transformative impact on cancer diagnostics and treatment modalities.

Guest Editor

Prof. Dr. Maxim V. Berezovski

Department of Chemistry and Biomolecular Sciences, University of Ottawa, Ottawa, ON K1N 6N5, Canada

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
