

## Special Issue

# Impact of Social Determinants on Cancer Care

### Message from the Guest Editor

Cancer care disparities remain a critical challenge in oncology, deeply rooted in the complex interplay of social determinants of health (SDOH). These determinants, encompassing socioeconomic status, education, neighborhood environment, and social support networks, profoundly influence the entire spectrum of cancer care. Socioeconomic disadvantages often lead to delayed diagnoses and reduced access to advanced treatments, resulting in poorer clinical outcomes. Moreover, geographic and environmental factors contribute to disparities, with residents of deprived areas facing higher exposure to carcinogens and limited access to specialized care facilities. This Special Issue will highlight the multifaceted impact of SDOH on cancer care, from prevention and diagnosis to treatment outcomes and survivorship.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
