

Special Issue

Flow Cytometry in Cancer Research

Message from the Guest Editors

The aim of the current Special Issue, “Flow Cytometry in Cancer Research”, is to define the state-of-the-art in the field as well as to present recent flow cytometry innovations with an application in cancer research. We wish to serve as a forum for researchers applying flow cytometry in oncology, leading to knowledge dissemination in the fight against this devastating disease. We are welcoming primary or review articles covering, but not limited to, the following topics:

- Reviews describing the state-of-the-art in the field;
- The contribution of cytometry in basic and translational cancer research;
- Novel methodologies for phenotypic analysis of cancer;
- Clinical or animal models that incorporate flow cytometry analyses;
- Technological and methodological advances of diagnostic techniques (for example, multiparametric analysis in hematology, oncology, immunology, etc.).

Guest Editors

Dr. George Vartholomatos

Dr. Lefkothea Dova

Dr. Georgios S. Markopoulos

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
