Recent Advances in Trachea, Bronchus and Lung Cancer Management

Message from the Guest Editors

According to the WHO, trachea, bronchus and lung cancer deaths rose to 1.8 million worldwide in 2019, remaining the leading cause of death from malignancies and the sixth most common cause of death overall. For upper-middle- and high-income countries, however, these occupied the fourth place. Nevertheless, significant breakthroughs are made every year in their management. The purpose of this Special Issue is to consolidate the most recent advances in trachea, bronchus and lung cancer management, from the moment of clinical suspicion to diagnosis and treatment options, aiming to provide a comprehensive and up-to-date tool which will assist clinicians in combatting this lethal disease.

Guest Editors

Dr. Serafeim Chrysovalantis Kotoulas

Dr. Dionisios G. Spyratos

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
