Prevention, Diagnosis and Treatment of Oropharyngeal Cancers

Message from the Guest Editors

The incidence of oropharyngeal cancer continues to increase. Persistent high-risk human papillomavirus (HPV) infection is the most significant cause of oropharyngeal cancer. Early detection and clinical diagnosis represent an important approach for cancer control. In addition, the advent of the HPV prophylactic vaccine has the potential to reduce the burden of HPV-associated oropharyngeal cancers. The scope of this Special Issue is to improve the understanding of oropharyngeal cancers, including its prevention, diagnosis and treatment.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
