Cancer Biomarkers in Body Fluids

Message from the Guest Editor

Recently, several scientific publications have provided proof of principle studies which show the great advantage of using circulating biomarkers to monitor exposure to cancer risk factors, increase the accuracy of cancer screening protocols, and detect actionable therapeutic targets. Liquid biopsy shows promise for cancer screening and diagnostics, though some technical challenges still remain. This Special Issue will highlight the state of the art in cancer biomarkers in body fluids and their potential application for cancer prevention/screening programs.

Guest Editor

Dr. Fabrizio Bianchi

Unit of Cancer Biomarkers, ISBReMIT, Fondazione IRCCS Casa Sollievo della Sofferenza, 71013 San Giovanni Rotondo, Italy

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
