Larynx Cancer: From Diagnosis to Treatment and Rehabilitation

Message from the Guest Editor

The incidence of laryngeal carcinomas is increasing. The complexity of these tumors is manifested in their dual impact on patients: not only do they grow and metastasize like other cancers, but they also change patients' voices and (when advanced) swallowing, resulting in clinical syndromes that significantly impact their quality of life. The majority of patients present with an early-stage tumor that mostly is treated with Laser/TORS, but the treatment of patients with advanced tumors is still challenging. However, recent advances in our understanding of the genetic alterations provide novel approaches to their treatment, including targeted therapy. Because physicians' responsibility does not end with the initial treatment, care of patients' rehabilitation is key to providing the best treatment. In this Special Issue, experts in this field will review the current approaches to the diagnosis, management, and rehabilitation of patients with the spectrum of laryngeal neoplasia.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
