

Topical Collection

Diagnosis and Treatment of Primary and Secondary Lung Cancers

Message from the Collection Editor

Both primary and secondary tumors of the lung are major issues for clinicians; in fact, primary lung cancer is one of the most frequently diagnosed cancers and is the leading cause of cancer-related death worldwide. On the other hand, lung is the second most common site of metastases and pulmonary metastasectomy is the most frequent surgical resection undertaken by thoracic surgeons. In this Topical Collection, we would like to focus on the most important corner stones of diagnosis and therapy of both primary and secondary lung cancers. It is our pleasure to lead such a comprehensive issue, and we look forward to receiving your valuable contribution.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
