

## Special Issue

# Measurable Residual Disease in Cancer

### Message from the Guest Editors

Measurable residual disease (MRD) refers to the presence of cancer cells below the threshold of detection when using conventional methods of assessing response to treatment. In this Special Issue, a panel of internationally recognized experts will focus on the current and future role of MRD in cancer with respect to MRD assessment techniques, MRD as a prognostic/predictive factor or therapeutic target as well as MRD-based directions in the anticancer drugs development. Potential topics include, but are not limited to:

- Systematic reviews on the current role of MRD in particular types of cancer
- Novel methods of MRD assessment and MRD standardization efforts in cancer
- Design and results of clinical trials testing MRD-driven treatment strategies
- Original studies reporting treatment of disease at MRD or subclonal levels in clinical practice
- Significance of genomic and spatial heterogeneity of MRD
- Role of tumor microenvironment regarding MRD persistence/eradication
- MRD as surrogate endpoint for new anti-cancer drug development and approval

---

### Guest Editors

Prof. Dr. Krzysztof Jamrozik

Department of Hematology, Transplantation and Internal Medicine,  
Medical University of Warsaw, Banacha 1a, 02-097 Warsaw, Poland

Dr. Bartosz Pula

Department of Hematology, Institute of Hematology and Transfusion  
Medicine, 02-776 Warsaw, Poland

---

### Deadline for manuscript submissions

closed (30 November 2023)

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
