

## Special Issue

# Pediatric Liver Tumors (Hepatoblastoma and Hepatocellular Carcinoma)

### Message from the Guest Editors

Pediatric liver tumors, including hepatoblastomas (HB) and pediatric hepatocellular carcinomas (HCC), are rare but devastating malignancies, the incidence of which has been increasing over the past few decades. The pathogenesis of these tumors is only partially known, with HBs having an extremely low mutational burden, with beta catenin mutations and Wnt pathway dysregulation being the most frequent molecular abnormalities. Pediatric HCC may develop against the background of specific hereditary diseases, including tyrosinemia and progressive familial intrahepatic cholestasis or viral infections, or may not have any predisposing factors. This current Special Issue of *Cancers* aims to collect a series of original and review articles on pediatric liver tumors from all angles of clinical and basic research, sharing both increases in the understanding of the pathogenesis of these tumors as well translational and clinical findings that may have direct effects on patient management.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
