Clinical Research Advances in Endometrial Carcinoma

Message from the Guest Editor

Endometrial cancer (EC) is the most common gynecologic malignancy in industrialized nations, and its incidence is increasing globally. Although EC is diagnosed at an early stage, about 20% of early-stage EC patients present poor outcomes. Furthermore, although the overall survival (OS) of EC patients is known to be relatively good, 10–15% of patients with low-risk EC experience a recurrence, while about 50% of patients with high-risk EC do not. For these reasons, there is a growing interest in a better understanding of genetic diversity, as well as a trend toward a more personalized diagnosis, surgical approach, adjuvant therapy, oncological surveillance, and the development of new and molecularly integrated protocols to manage endometrial cancer. The Special Issue will focus on epidemiology, pathophysiology, diagnosis, molecular classification, and recent advancements in disease management.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
