Small Cell Lung Cancer: A New Era Is Beginning?

Message from the Guest Editors

Small-cell lung cancer (SCLC) is the most aggressive lung cancer: No significant progress has been made in decades, and platinum-based chemotherapy has for a long time represented the standard of care. The improvement in the knowledge of the biology of SCLC has led to the development of new experimental therapies that have shown promising results, including poly [ADP-ribose] polymerase (PARP) inhibitors, anti-Notch ligand Delta-like protein 3 (anti-DLL3), antibody–drug conjugates, and aurora kinase inhibitors. Future challenges are the identification of predictive biomarkers for immunotherapy, the definition of the role of new biological agents, and the improvement of integrated approached for limited disease. This Special Issue will highlight the current state of treatment of limited and extensive SCLC, focusing on biology of SCLC, immune-checkpoint inhibitors, antibody–drug conjugates, PARP inhibitors, and novel cytotoxic chemotherapy and radiotherapy techniques. About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
