

Special Issue

The Role of Genes in Prostate Cancer

Message from the Guest Editor

We are delighted to introduce this Special Issue of *Cancers* on the role of genes in prostate cancer. Prostate cancer is the fifth leading cause of cancer death in men worldwide, with an estimated 1.4 million cases of prostate cancer diagnosed, and an estimated 375,000 men have died from prostate cancer. Prostate cancer is a clinical and molecular heterogeneous disease with disparities in incidence and mortality. This Special Issue will highlight new genetic and genomic insights into prostate cancers, which have provided a better comprehensive landscape of the germline variations or somatic molecular profiles involved in prostate cancer carcinogenesis or in the progression to metastatic and lethal disease.

Guest Editor

Prof. Dr. Olivier Cussenot

Nuffield Department of Surgical Sciences, University of Oxford, Level 6, Room 6600, John Radcliffe Hospital, Headley Way, Headington, Oxford OX3 9DU, UK

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
