

# Special Issue

## Updates on AI in Breast Imaging

### Message from the Guest Editors

The aim of this Special Issue is to consolidate the latest research, advancements, and insights into the role of artificial intelligence in breast imaging. It will encompass a range of topics including, machine learning algorithms, deep learning techniques in mammography, ultrasound, MRI, and tomosynthesis, AI in risk prediction models, and the ethical implications of AI in clinical practice. It will also include the exploration of AI's impact on workflow optimization, diagnostic accuracy, patient outcomes, and the challenges in implementing AI tools in breast imaging practice. The Special Issue will seek contributions that offer the following:

- Original research on AI algorithms that enhance the detection and characterization of breast pathology.
- Discussions of the integration of AI in current breast imaging modalities, highlighting improvements and outcomes.
- Current state and future perspectives of AI applications in breast imaging.
- Examinations of the ethical, legal, and social implications of AI in the clinical setting, particularly in breast imaging.
- Analyses of the economic impact and cost-effectiveness of AI implementation in breast cancer screening and diagnosis.

---

### Guest Editors

Dr. Filippo Pesapane

Breast Imaging Unit, European Institute of Oncology (IEO), 20141 Milan, Italy

Dr. Ottavia Battaglia

Postgraduation School in Radiodiagnostics, Università degli Studi di Milano, 20122 Milan, Italy

---

### Deadline for manuscript submissions

closed (31 July 2024)

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
