

Special Issue

Prostate Cancer Epidemiology and Genetics

Message from the Guest Editor

We are pleased to invite you to contribute an article to our Special Issue within the journal *Cancers* entitled “Prostate Cancer Epidemiology and Genetics.” This Special Issue aims to explore recent developments specifically in the fields of genetics and epidemiology as they relate to prostate cancer mortality. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- The contribution of aging to the risk of prostate cancer mortality;
- Population-level work on novel biomarkers for prostate cancer risk and progression;
- Lifestyle factors that may impact on prostate cancer risk and progression;
- Environmental and occupational factors that impact on prostate cancer risk and progression;
- The contribution of specific genetic anomalies to the risk of prostate cancer mortality;
- Clinical efforts to increase uptake of genetic testing in patient populations;
- Highlights from recent meetings regarding prostate cancer genetic risk;
- Population-level work on novel biomarkers for prostate cancer risk.

I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief
