

Special Issue

Characterization of Disorder in Carbons (2nd Edition)

Message from the Guest Editor

We are soliciting contributions to the Special Issue of C, on the topic of the “Characterization of Disorder in Carbons”. The aim of this Special Issue, devoted to reviews, research articles, or short communications, is to highlight the strengths and to discuss the weaknesses of the relevant techniques, compiling examples applied, but not limited, to relevant disordered carbons, from amorphous carbons to 3D graphene. The aim is also to give a review of the techniques used in the field in order to better characterize the nature of these defects and their influence. The first volume of this Special Issue has published eight interesting papers with 12,558 views. You are welcome to read them and submit some of your work to this issue.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Craig E. Banks
Faculty of Science and Engineering, Manchester Metropolitan
University, Chester Street, Manchester M1 5GD, UK

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, CAPlus /
SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Multidisciplinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 19.8 days after
submission; acceptance to publication is undertaken in 3.6
days (median values for papers published in this journal in
the first half of 2024).
