

Special Issue

Carbon-Based Materials Applied in Water and Wastewater Treatment

Message from the Guest Editor

This Special Issue will bring into the spotlight contemporary research on the development and exploration of carbon materials in water and wastewater treatment, distinguished by their exceptional adsorptive capacities, high pollutant removal efficiencies, multifunctionality, structural stability, cost-effectiveness, and environmental congeniality. Topics may include, but are not limited to, studies on innovative integrated processes for the removal of emerging pollutants; the application of carbon-based materials in actual industrial wastewater; and novel carbon-based material synthesis technology. Water and wastewater treatment technologies that can deal with pollutants of concern to the aquatic environment, such as membrane filtration, adsorption, coagulation, ion exchange, biological processes, ozonation, and advanced oxidation processes or hybrid processes, are also of interest to investigate with applications from carbon-based materials. This Special Issue collects original research and critical reviews about scientific and technical information. Case studies describing real-life applications of novel technologies are also very welcome.

Guest Editor

Dr. Athanasia Tolkou

Department of Chemistry, School of Science, Democritus University of Thrace, GR-654 04 Kavala, Greece

Deadline for manuscript submissions

25 December 2024

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Craig E. Banks
Faculty of Science and Engineering, Manchester Metropolitan
University, Chester Street, Manchester M1 5GD, UK

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, CAPlus /
SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Multidisciplinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 19.8 days after
submission; acceptance to publication is undertaken in 3.6
days (median values for papers published in this journal in
the first half of 2024).
