

Topical Collection

Nanoporous Carbon Materials for Advanced Technological Applications

Message from the Collection Editors

We would like to invite you to submit original papers, feature articles, reviews to this Topical Collection of *C*, a journal on carbon research, entitled “Nanoporous Carbon Materials for Advanced Technological Applications.” The aim of this topical collection is to publish recent developments and interesting novel insights into the production of high surface area and large-porosity nanoporous carbon materials with interconnected pore structures for technological applications including adsorption, catalysis/photocatalysis, energy storage (supercapacitors and batteries), energy conversion, vapor or gas sensing, and others. Emphasis is given to papers describing fabrication, characterizations, structure-property relation, porosity tuning, surface functionalization, hetero-atom doping, and also the binary or ternary composite materials that enhance the overall performance of the materials. We are looking for outstanding high-performance nanoporous carbon materials fabricated from synthetic or natural precursors including agro-wastes or biopolymers either by templating method or by direct carbonization of chemical activation methods.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Craig E. Banks
Faculty of Science and Engineering, Manchester Metropolitan
University, Chester Street, Manchester M1 5GD, UK

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, CAPlus /
SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Materials Science, Multidisciplinary)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 19.8 days after
submission; acceptance to publication is undertaken in 3.6
days (median values for papers published in this journal in
the first half of 2024).
