# Special Issue

# Molybdenum Catalysis

### Message from the Guest Editor

Molybdenum-catalyzed systems have received interest from both academic and industrial research laboratories because of the need to obtain important building blocks in organic synthesis and polymer science. The oxidation of alcohols to aldehydes and ketones, the epoxidation of olefins and amines, and reduction or metathesis reactions are important transformations in organic synthesis. Within this field there are several experts that have developed many works dealing with the exploitation of the capabilities of several homo- and heterogeneous molybdenum-based catalytic systems. This Special Issue will aim to gather recent developments in catalysis mediated by molybdenum either in homo- or heterogeneous phase.

### Guest Editor

Dr. Carla D. Nunes

Department of Chemistry and Biochemistry, Faculty of Science, UL, Campo Grande, C8, 1749-016 Lisboa, Portugal

### Deadline for manuscript submissions

closed (31 January 2021)

# About the Journal

**Message from the Editor-in-Chief**

### Editor-in-Chief

Prof. Dr. Keith Hohn

Carl R. Ice College of Engineering, Kansas State University, Manhattan, KS, USA

### Author Benefits

**High Visibility:**
indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, CAB Abstracts, and other databases.

**Journal Rank:**
JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science )

**Rapid Publication:**
manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
