

Special Issue

Catalytic Materials: State-of-the-Art and Perspectives in Spain

Message from the Guest Editors

When addressing the current challenges of society related to the increase in concern about the environment, industrial emissions, and the use of chemicals, new emerging technologies are needed. The solutions to such great challenges pursue sustainability and should mainly be based on zero waste, decarbonization, and cyclic economy. In this sense, catalysis is essential, as it is well known that it can boost and/or improve processes, e.g., by reducing their reaction times, related waste or costs. Furthermore, catalysis-based research may provide deep molecular insight into a process, broadening the understanding of the mechanisms of chemical reactions. This Special Issue will try to collect the latest research developed in Spain related to catalysis, paying special attention to environmental, energy, and chemical applications.

- catalysts preparation and characterization
- homogeneous and heterogeneous catalysis
- environmental catalysis
- catalysis and energy
- bio(mimetic)catalysis
- electrocatalysis
- photocatalysis
- multifunctional catalysts
- CO₂ conversion

Guest Editors

Prof. Dr. Diego Luna

Dr. Sergio Carrasco

Dr. Rebeca Martínez-Haya

Deadline for manuscript submissions

closed (31 May 2024)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn
Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,
CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General
Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 12.9 days after
submission; acceptance to publication is undertaken in 2.8
days (median values for papers published in this journal in
the first half of 2024).
