

Special Issue

Functional Electrochemical Catalysts in Energy Conversion and Storage Devices

Message from the Guest Editor

This Special Issue “Functional Electrochemical Catalysts in Energy Conversion and Storage Applications” covers synthesis, characterization, nanostructure, and electrochemical catalytic activity analysis of various electrochemical catalysts for photoenergy conversion and energy storage applications. For example, the electrochemical catalytic effects of metal oxide, metal nitride, and metal sulfide on the electrode of dye sensitized solar cells, organic solar cells, perovskite solar cells, electrochemical cells, supercapacitors, fuel cells, polymer lithium batteries, photoenergy conversion devices, and energy storage devices are of interest. Both reviews and original papers are welcome.

Guest Editor

Dr. Rong-Ho Lee

Department of Chemical Engineering, National Chung Hsing University, Taichung 402, Taiwan

Deadline for manuscript submissions

closed (31 January 2022)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn
Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,
CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General
Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 12.9 days after
submission; acceptance to publication is undertaken in 2.8
days (median values for papers published in this journal in
the first half of 2024).
