## Plasma Catalysis

### Message from the Guest Editor

Plasma catalysis is gaining increasing interest for various gas conversion applications, such as CO<sub>2</sub> conversion, N<sub>2</sub> fixation, CH<sub>4</sub> conversion and air pollution control. Plasma catalysis allows thermodynamically difficult reactions to proceed at ambient pressure and temperature. However, plasma is very reactive but not selective, and thus a catalyst is needed to improve the selectivity. Plasma catalysis is quite complicated, as the plasma will affect the catalyst and vice versa. Moreover, due to the reactive plasma environment, the most suitable catalysts will probably be different from thermal catalysts. More research is needed to better understand the plasma–catalyst interactions, in order to further improve the applications. Submissions to this Special Issue are welcome in the form of original research papers or short reviews that reflect the state of the art in the above-mentioned applications.

### Guest Editor

Prof. Dr. Annemie Bogaerts

Department of Chemistry, University of Antwerp, Campus Drie Eiken – Room B2.09, Universiteitsplein 1, Wilrijk, BE-2610 Antwerp, Belgium

### Deadline for manuscript submissions

closed (30 November 2018)

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Keith Hohn  
Carl R. Ice College of Engineering, Kansas State University, Manhattan,  
KS, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,  
CAPlus / SciFinder, CAB Abstracts, and other databases.

##### Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General  
Environmental Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 13.9 days after  
submission; acceptance to publication is undertaken in 2.6  
days (median values for papers published in this journal in  
the second half of 2024).
